

PRESS RELEASE

ATMI Selects Rinchem as Lead Logistics Provider to Streamline Its North America Distribution Network

ALBUQUERQUE, NM., November 15, 2007 – Rinchem Company, Inc., a global provider of chemical and gas management solutions announced today that it has been selected by ATMI, Inc. (Nasdaq: ATMI) as a lead logistics provider for ATMI's North America distribution network. Rinchem provides customized logistics solutions to users and manufacturers of high purity, pre-packaged, regulated and non-regulated chemicals and gases.

“We are excited to help ATMI further optimize and streamline its chemical distribution activities. ATMI's selection of Rinchem is a good strategic fit because Rinchem already provides services to many current ATMI customers and understands the unique requirements associated with managing complex chemical and gas supply chains,” said Jim Moore, President of Rinchem.

As a lead logistics provider, Rinchem will manage all North American logistics-related supplier contracts on behalf of ATMI and coordinate logistics-related activity amongst those suppliers. Rinchem will also evaluate all logistics related costs, modes of transport, capacity utilization levels, supplier coordination and customer service performance levels to identify strategies for improvement. Gains in efficiency and cost reduction will then be tracked through jointly developed key performance measures established to monitor the health and performance of ATMI's North America distribution network.

Rinchem operates thirty-five customized, temperature-controlled warehouses that are linked through its Chem-Star® warehousing and transportation management system, enabling customers to achieve increased visibility, coordination and control of distribution activities. Rinchem also manages a fleet of specially trained drivers and vehicles, providing over-the-road transport or local delivery of high purity, specialty chemicals to most major manufacturers within the U.S. semiconductor industry. Rinchem began providing services to ATMI as a lead logistics provider on November 1st, 2007.
