

PRESS RELEASE

Rinchem Opens Customized Warehouse, Expanding Chemical Logistics Services to the Austin, Texas Area

ALBUQUERQUE, NM., March 14, 2008 – Rinchem Company, Inc., a global provider of chemical and gas management solutions, announced today that it has opened a customized, temperature controlled warehouse in Buda, Texas. The new warehouse is located a short distance from Austin and is designed to meet the needs of the area's growing high-tech sector.

According to Lise Gorgone, Director of Operations for the Texas region, "Rinchem is well positioned to partner with key players in Austin's semiconductor and electronics industries to deliver customized, cost-saving chemical management services. What sets us apart from other logistics providers is that our primary focus and area of expertise is the safe and efficient management of chemicals and gases – we safely handle or transport hundreds of millions of pounds of chemicals on an annual basis."

The new facility has 42,000 square feet of warehouse space and is set up to handle segregation and temperature requirements associated with the safe storage and handling of regulated and non-regulated chemicals and gases. Rinchem also offers temperature controlled, local delivery to the Austin area and GPS monitored, over-the-road transportation to a variety of different destinations throughout the country.

Rinchem provides bonded transportation services to regional customers, as well as providing services to and from ports along the Texas coast. Rinchem's bonded status allows it to transport goods in and out of ports and free trade zones without incurring immediate import duties, taxes and other charges.
