**Albuquerque, NM. November 2, 2007** – Rinchem Company, Inc., a global provider of chemical and gas management solutions, has expanded its warehouse space by 110,000 square feet with the purchase of a warehouse facility on nineteen acres in Flemington, New Jersey. This expansion supports Rinchem’s strategy to increase its services offerings in the chemical, pharmaceutical, and biotechnology logistics industries, as well as better serve its other customers in the East.

The facility is located within fifty miles of three of Rinchem’s largest customers, and is currently being used for storage of non-regulated materials. Retrofitting construction has been underway for three months for chemical, bio-tech/pharmaceutical, and food-grade storage safety requirements. Existing and new clients will utilize the large capacity of the warehouse in the coming months.

Michael Gingerella, Rinchem’s Business Development Manager stated, “The purchase of this facility provides Rinchem with a strategic advantage for our customers operating in the East. We have large-capacity facilities and partners all along the Eastern seaboard, with specialty facilities for chemicals and bio-tech/pharmaceuticals in Massachusetts, Pennsylvania, New Jersey, and Georgia.”

For more information about the additional warehouse facility or Rinchem’s Northeastern U.S. facilities, please contact Michael “Ging” Gingerella by telephone at 480-710-8631 or by email at [ging@rinchem.com](mailto:ging@rinchem.com).

Rinchem Company, Inc is a leading provider of chemical management services to the semiconductor, chemical manufacturing, pharmaceutical and biotechnology industries in North America, Asia, Europe, and the Middle East. The company’s network of service centers, warehouses, and transportation fleet provides its customers with full supply chain management solutions related to chemicals and environmental concerns. In business since 1976, Rinchem provides comprehensive services including Chemical Warehousing, Chemical and Waste Transportation, Waste Stream Management, and Safety and Regulatory Training and Consulting.
