Albuquerque, NM. November 29, 2007 – Rinchem Company, Inc., a global provider of chemical management solutions, announced today that it has achieved ISO 9001 certification at two of its newest facilities located in California. The two facilities, Santa Fe Springs and Long Beach, worked on the same timeline for certification, which began a year ago. However, the bulk of the work for certification was completed in just three months.

The Santa Fe Springs facility is a 40,000 square foot chemical warehouse consisting of corrosives, flammables, and oxidizer storage rooms. The ISO 9001 certification is important to both the standards of Rinchem's customers and employees, assuring a consistently safe and efficient facility. Andrew Maule, Santa Fe Springs Facility Manager stated, "When quality of service counts, our ISO certification narrows the playing field and provides customers with a view of Rinchem's top quality resources worldwide."

The Rinchem Long Beach facility is a 1.9 acre facility with a 30,000 square foot warehouse. The warehouse is capable of storing both regulated and non-regulated material. Additionally this facility has a rail spur that allows transloading of bulk material from tankers for local deliveries, and the ability to load and unload rail box cars. The team, headed by Michael Setka, Rinchem Long Beach Operations Manager, had to redesign the operating practices, train employees, and implement reporting and tracking software that had not been used previously. Setka stated, "Everyone at Rinchem gave one-hundred percent effort to get this certification in a short period of time. I am deeply impressed with the team's dedication and vision."

Jim Moore, President of Rinchem, stated, "Our plan to have every Rinchem facility ISO 9001 certified is becoming a reality. The work that Rinchem's employees have done to assure certification is a testimonial to the focus and drive of our company to continuously improve quality and service to our customers."

For more information about ISO 9001 certification at the Santa Fe Springs location, please contact Andrew Maule by telephone at 562-463-5500 or by email at amaule@rinchem.com. For information about the Long Beach facility, please contact Michael Setka by telephone at 310-537-9685 or by email at msetka@rinchem.com.

Rinchem Company, Inc is a leading provider of chemical management services to the semiconductor, chemical manufacturing, pharmaceutical and biotechnology industries in North America, Asia, Europe, and the Middle East.
