

PRESS RELEASE

Rinchem Opens Chemical Warehouse in the Portland Area

ALBUQUERQUE, NM., November 29, 2007 – Rinchem Company, Inc., a global logistics provider of chemical and gas management solutions announced today the opening of a new 50,000 square foot, customized warehouse to support increased business in the Portland, Oregon area. The new facility is equipped to handle a diverse range of temperature and segregation requirements associated with the safe storage and handling of high purity, pre-packaged, regulated and non-regulated chemicals and gases.

“Rinchem works with its customers to streamline the chemical supply chain. We offer an asset-based, integrated service model involving over-the-road transportation, warehousing, delivery, empty container return and other services associated with management of chemicals and gases. This single-source solution leads to an increase in visibility and coordination, which ultimately reduces cost, risk and waste,” said Allen Whitton, Manager of Rinchem facilities within the Portland, Oregon area.

“Rinchem’s presence in the Portland area will continue to be of important strategic significance as we further expand into Asia,” said Jim Moore, President of Rinchem. The Portland site currently serves as a hub for chemicals being imported into the United States and exported abroad, along with Rinchem’s existing Long Beach and Santa Fe Springs facilities. The new facility will be linked to Rinchem’s network of thirty-five warehouses through its Chem-Star® warehousing and transportation management system, offering customers real-time, 24/7 inventory visibility via the Internet.
